COMP1511/COMP1911

Week 2!

M13B: 1pm – 4pm || T11X: 11am – 2pm

Tutors: William (me!) + Jason || Daniel

My GitHub:

https://github.com/william-o-s/unsw_comp1511_tutoring

Tutorial Agenda:

Part 1

Part 2

Part 3

Part 4

Part 5

Extras
(time- dependent)

What are the three data types we've learnt?

?

In groups, note the operators you remember in each category

Let's practice some calculations

$7 / 2$ = ?

$(3.0 / 2) + 1$ = ?

`'a' + 5` = ? (assume char)

`'F' - 'A' + 'a'` = ? (assume char)

Let's break down this flowchart into pseudocode

Some COMP1511 style points:

Horizontal whitespace

Vertical whitespace

Indentation

Header comment

Good variable names

Constant usage

What are the three data types we've learnt?

?

?

?

What are the three data types we've learnt?

?

?

?

Examples

1,2,3,4,5

1.0, 2.0, 3.0, 4.0, 5.0,
6.0, 7.0, 8.0, 9.0, 10.0

'a', 'b', 'c'

What are the three data types we've learnt?

int

double

char

Examples

1,2,3,4,5

1.0, 2.0, 3.0, 4.0, 5.0,
6.0, 7.0, 8.0, 9.0, 10.0

'a', 'b', 'c'

Variables

```
int age;
```

```
double distance;
```

```
char grade;
```

Printing

```
printf("Age: %d, Distance: %lf, Grade: %c", age, distance, grade);
```

Let's code it!

In groups, note the operators you remember in each category

Arithmetic Operators
(basic math)

Logical Operators
(conditionals)

Comparison Operators
(more conditionals)

Did you get them all?

Arithmetic Operators
(basic math)

+ -
* /
%

Logical Operators
(conditionals)

&&
==
!

Comparison Operators
(more conditionals)

< >
<= >=
!= ==

Oh, and what's the difference between these two?

/

vs.

%

Let's practice some calculations

$7 / 2$

$= ?$

$(3.0 / 2) + 1$

$= ?$

$'a' + 5$

$= ?$ (assume char)

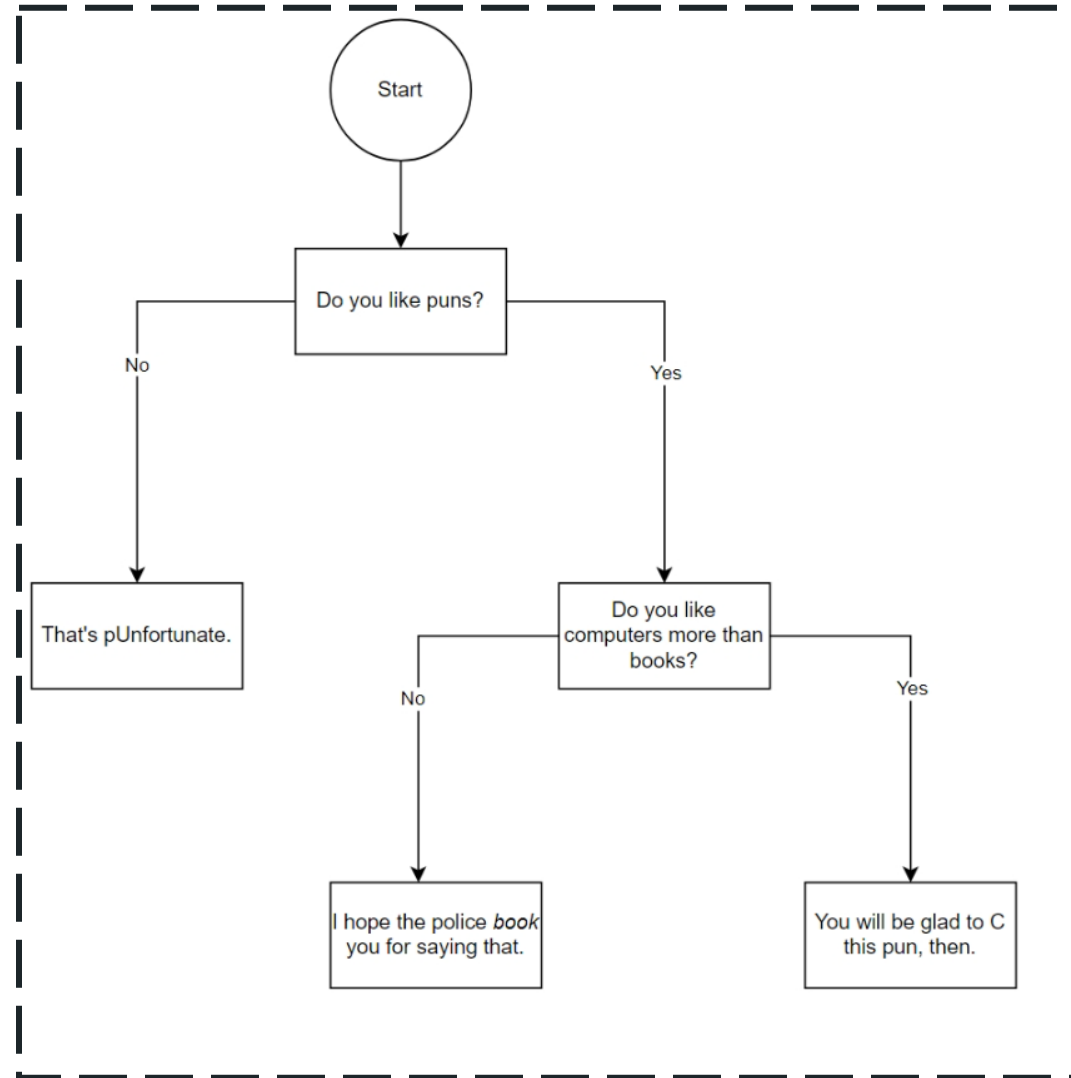

$'F' - 'A' + 'a'$

$= ?$ (assume char)

Always use what is sensible!

 $7 / 2$ $= 3$ $(3.0 / 2) + 1$ $= 2.5$ $'a' + 5$ $= 'f' \text{ or } 102$ $'F' - 'A' + 'a'$ $= 'f' \text{ or } 102$

Let's break down this flowchart into pseudocode

If we have time, let's do the opposite
